

2001
Approved Amendments to the 1991 Concession Management Plan

1. The National Park Service, Lake Roosevelt National Recreation Area, proposes to expand the Kettle Falls Marina (revision to pg 10 of CMP), to include deep water moorage, per the approved General Management Plan (GMP). With the current fluctuations in lake level, there is a need for deep water moorage at Kettle Falls. The current marina location goes dry at lake elevation 1275'.

2. The National Park Service is proposing the addition of a concession operated facility at the Hunters Campground (addition to pg 11 of CMP). Facilities would include sewage pump out, gas dock, and convenience/camp store. Priority will be given to installation of a sewage pumpout facility.

NPS would provide the basic infrastructure for the project. Hunters is ideally situated to serve a portion of the lake where visitor services are non-existent. In addition, pumpout facilities are needed to serve houseboats and other boaters on this portion of the lake.

3. The Colville Confederated Tribes are proposing the addition of Quarry Falls Development as a development zone (addition to pg 9 of CMP).

The proposed project is located on the north bank, behind Grand Coulee Dam, and would provide much needed visitor services at the lower end of the lake. The proposed project is consistent with the increasing visitor demand to Grand Coulee Dam area and southern end of the lake. The Colville Tribe is proposing a full scale destination resort, hotel, convention center, and events arena.

4. The Spokane Tribe is proposing the inclusion of a tour boat service (addition to pg 12 of CMP) for the Two Rivers Resort. The tour boats would provide guided tours of Lake Roosevelt and the Spokane Arm.

Large tour boats (carrying more than 6 passengers) would operate under the United States Coast Guard's regulations for boat size, number of boat occupants, safety and general boating procedures.

5. Small Commercial Operations (addition of #14 on page 12 of CMP)

The managing partners will issue permits for small commercial operations such as fishing guides and small tour boats. Small commercial operations are defined as operations with annual gross receipts of not more than \$25,000 resulting from services originating and provided solely on Lake Roosevelt. These operations also involve incidental use of facilities and resources with the services originating and terminating off federal lands.

This amendment would cover businesses that don't require fixed facilities, but just use the lake and launch facilities. The managing partners will explore developing a joint permit that covers such uses on a lakewide basis.

6. Shoreline Management Plan (addition of #15 on page 12 of Concession Management Plan)

All commercial activities and facilities will be consistent with the approved Shoreline Management Plan (or its equivalent) of the managing partner under whose management jurisdiction a proposal would fall. The plans, as of December 2000 are:

National Park Service:
General Management Plan, Lake Roosevelt National Recreation Area
Approved: January 2000

Colville Confederated Tribes:
Shoreline Management Plan
Approved: November 5, 1998

The amendment provides for consistency with each managing partner's respective shoreline management plan. Individual shoreline management plans provide for protection of cultural and natural resources, and provide for appropriate levels of development.

Acceptance and Approval

The undersigned accept and approve the amendments to the 1991 Lake Roosevelt Concession Management Plan. The Plan, as amended, will be in effect until January 1, 2011.
